

NEO Wallet Browser Extension

NEO wallet browser extension provides an easy way for browser games or DApps to interact with NEO blockchain without running a NEO full node. It plays the role as a NEO wallet as well as accessing point to the NEO blockchain to invoke smart contracts. Therefore, developers can focus more on build blockchain games and smart contracts.

Currently, there are several NEO wallet browser extensions provided by NEO communities. They support APIs or functions that a blockchain game or DApp may requires.

We have gathered all the useful guide or instructions for the following NEO wallet browser extensions.

1. NEOLine

- Download the latest version of NEOLine [here](#).
- To learn how to use NEOLine, please visit [NEOLine Guide](#).
- For developers to learn how to develop games or DApps, please reference to [NEOLine API reference](#).

2. Teemo

- For download and installation guide, please visit [Teemo's website](#)
- For game and DApp developers, please visit [NEO dApi documents](#) to learn how to use Teemo with your project.

4. O3

O3 is different as other two browser extensions. It is not a browser extension, but a standalone desktop application which could be used with games or DApps to interact with NEO blockchain.

- Please download O3 [here](#).
- For how to setup and use O3, please visit [O3 Documentation](#).
